

Corrected figure 9A from Asher, Emry, and McKenna (J. Vert. Paleo. 25(4): 919). Strict consensus of 4 MPTs, 27554 steps, morphology plus sequence dataset of Roca et al. 2004, excluding third positions. Numbers above nodes indicate branch support; numbers below indicate bootstrap support. Extinct taxa are identified with a dagger; lipotyphlans are shown in bold.
